

Fitment Guide

## Honda CBR600RR 2007

Written by ferret, Honda JDM Forum

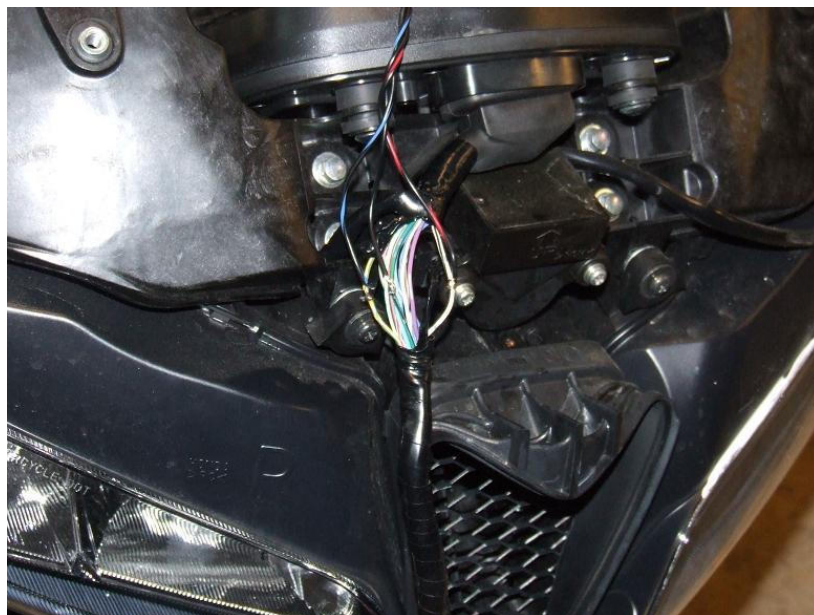

Well I must say this was the easiest install of anything I have ever done.

Take the top fairing off to get to the back of the tacho.

I decided to solder, as I have the equipment, rather than use the supplied joiners.

So trim the wire to length and stick them on.

**Shift-I                      CBR600RR**

- Tacho**    Black/Blue → Yellow/Green
- Ignition** Black/Red → White/Black
- Ground**    Black        → Green/Black
